

NEXT LEVEL API TESTING ROADMAP

Day 1-2: Advanced JavaScript Basics

- Objects, arrays, conditions, functions
- JSON handling

Day 3: Deep API Concepts

- REST APIs, status codes, headers
- Request/Response lifecycle

Day 4: Postman Advanced Usage

- Collections, environments, variables
- Chaining requests

Day 5: Postman Scripting

- `pm.response.json()`
- `pm.environment.set/get()`
- Writing test scripts

Day 6: Validation Testing

- Status checks
- Response structure validation

Day 7: Full Flow Testing

- Start → Stop → Verify billing

Day 8: Edge Case Testing

- Invalid inputs
- Duplicate requests
- Missing data

Day 9: Automation Basics

- Collection runner
- Run multiple requests automatically

Day 10: Interview Preparation

- Explain API testing
- Show your project flow
